Culture – Connecting Community & Commerce

Club culture is set from the top down. Both the board and senior management are responsible for implementing it – especially with staff. Simon Walshaw, Founder Grace Curve Consulting who has over 10 years of industry experience at Mingara Leisure Group, will review the tools and processes clubs can utilise to ensure a winning culture that will support and develop the best commercial outcomes. Great culture builds great connection to your community, which in turn supports a healthy bottom line.

Leadership Performance

This session will provide critical guidance on industry tools and procedures that club boards can use to measure and improve the performance of their leadership teams, starting with the identification of skills, knowledge and experience. This measurement will highlight the strengths of the team and areas for improvement, creating a benchmark for the club board and management to build on for the future viability of the organisation.
